REVISIONS:

New Squeegee Sizes Available - Effective October 1st:

Our new style squeegees are now available in 2 additional sizes - 33" & 39" making a total of 4 different sizes for a wider variety in applications and better performance. The new standards will begin shipping on machine starting October 1st, 2016.

The standard squeegee sizes listed below were selected based off of a balance of the smallest size as well as ability to pick up path of water created by deck size. All machines have larger and smaller size squeegees as options as we realize sometimes the application demands it.
